

Prospector Keyboard Shortcuts

F1	Help
Alt+Enter	View properties for selected program or profile
Ctrl+3	Create an arc through the last 3 points of a profile under construction
Ctrl+O	Open a project.
Ctrl+N	Create a new project
Ctrl+Z	Undo the last action
Ctrl+Y	Redo the last action
Ctrl+X	Cut the current selection and put it on the clipboard
Ctrl+C	Copy the current selection and put it on the clipboard
Ctrl+V	Insert the contents of the clipboard
Del	Delete a program selected in the program tree or delete selected profile(s)
Esc	Exit a modal function (e.g. creating circles) or abandon a command (cancel a dialog)
Space	Choose the next closest candidate profile when picking geometry
a	Add a point to a profile under construction using Smart Snap to snap to nearby geometry
C	Continue chaining together disjoint profiles
c	Center the view at the current position of the cursor
d	Delete the last point added to a profile under construction
F	Make active the cutter path nearest the cursor
f	Add a point to the current profile under construction in free space (don't snap to geometry)
i	Add a point to the current profile under construction at an intersection of 2 or more profiles
l	Clear and redraw the screen
m	Add a point to the current profile under construction at the center of the arc or circle nearest the cursor
n	Add a point to the current profile under construction at the vertex of a profile nearest the cursor
r	Show or hide the viewing trackball
s	Deactivate and active program.
S	Cease building a profile under construction
v	Close the current profile under construction by adding a point to the beginning of it.
x	When a cutter path is activated, move the tool forward in the path.
X	When a cutter path is activated, move the tool backwards in the path.
y	Measure the distance between 2 points
z	Zoom into the 3D view
Z	Zoom out of the 3D view
Arrow Keys	Shift the view in the direction of the arrow key
