

PROSPECTOR™

The Gold Standard In Toolmaking

Annual Software Support Contract

Keep your team running at full-speed with the latest software updates.

A Prospector Software Support contract guarantees that your team will always have the latest & greatest software as soon as it's released.

The 12-month software support contract includes:

- ✓ *All software updates to Prospector that are published during the term of the agreement. Software update includes one set of media and one set of release notes. Software updates typically include product enhancements, corrective maintenance and other technical modifications.*
- ✓ *Access to Service Packs Prospector that are published during the term of the agreement. Service Packs are downloaded hot-fixes that are made available in between releases to correct serious problems that can not wait for a full release.*
- ✓ *Phone and e-mail support to assist customer with questions or problems specifically related to the installation and licensing of software updates.*
- ✓ *Invitation to free seminars conducted periodically to introduce new software releases.*
- ✓ *Eligibility for the Pro/Post Custom Post Processor software program.*
- ✓ *No cost replacement of a defective Hardware Lock for any license.*
- ✓ *Access to a dedicated e-mail address: amt-support@amt-software.com - to report software problems and request software enhancements.*

Even if you are you're just a couple of releases behind, you've missed out on many new features and enhancements that can have a significant impact on your productivity and profitability. Stay current with the latest developments throughout the year with a software support contract that covers all your licenses.
